

PRIORITIZING CYBERSECURITY: DYNICS AND CORNERSTONE'S PARTNERSHIP

DYNICS & CORNERSTONE QUICK STUDY

OVERVIEW

Technology is always changing, but DYNICS and long-time partner Cornerstone are here to help you navigate it. Through years of working together, Cornerstone and DYNICS have brought innovative cyber protection, control, and visibility to the industrial market and beyond.

In its dedication to providing high tech industrial solutions for automotive, food and beverage, disposable consumable goods, specialty metals, among other verticals, Cornerstone has enlisted DYNICS to ensure that these diverse operators are equipped to thoroughly and proactively shield their OT settings. By instilling cybersecurity as the foundation of its products and frameworks - an approach too often minimized in the ICS environment - DYNICS offers Cornerstone customized strategies that come with a keen understanding of industrial protocols that perfectly complement their expertise.

As even more sophisticated tech, such as PLCs and robotics, further influences the plant floor, Cornerstone and DYNICS will continue to unite in the mission to assist companies of all sizes properly and smartly integrate these modern elements while maintaining comprehensive, strong security.

BENEFITS

- ✓ As Cornerstone helps industrial clients solve automation challenges, they enlist DYNICS and its products to ensure that cybersecurity is a main part of their approach.
- ✓ DYNICS offers Cornerstone solutions that are specifically designed with OT environments in mind.
- ✓ Because of their long-time partnership, DYNICS and Cornerstone are able to work closely together to innovate the services that they offer in the wake of a quickly evolving tech landscape.
